Diana Voronova

QA Engineer

Profile

I am an ISTQB-certified QA Engineer with a passion for testing and programming, seeking opportunities to grow further in software quality assurance.

I am a quick learner who understands concepts deeply and finds effective solutions. My high empathy helps me understand user behavior and scenarios, enhancing my testing strategies. I am open to challenges and growth opportunities.

If you're looking for a dedicated QA Engineer who can quickly learn and apply new technologies, please feel free to reach out to discuss how my skills and experience can benefit your team.

Employment History

QA engineer at Wonderkind, Amsterdam

February 2024

In my current role at Wonderkind, I am responsible for:

- Owning and implementing project coverage, traceability, and test strategy.
- Educating manual testers in Karate, API testing, TypeScript, and Cypress.
- Facilitating communication between Product, Development, and QA team.
- Performing manual regression testing, writing test automation scripts, and conducting exploratory testing.
